**Major:** Computer Information Systems  
**School:** Georgia State University  
**Graduation:** Spring 2022  
**Senior Leader:** Kevin Hart  
**Hiring Manager:** Lisa Pinkey-Coleman

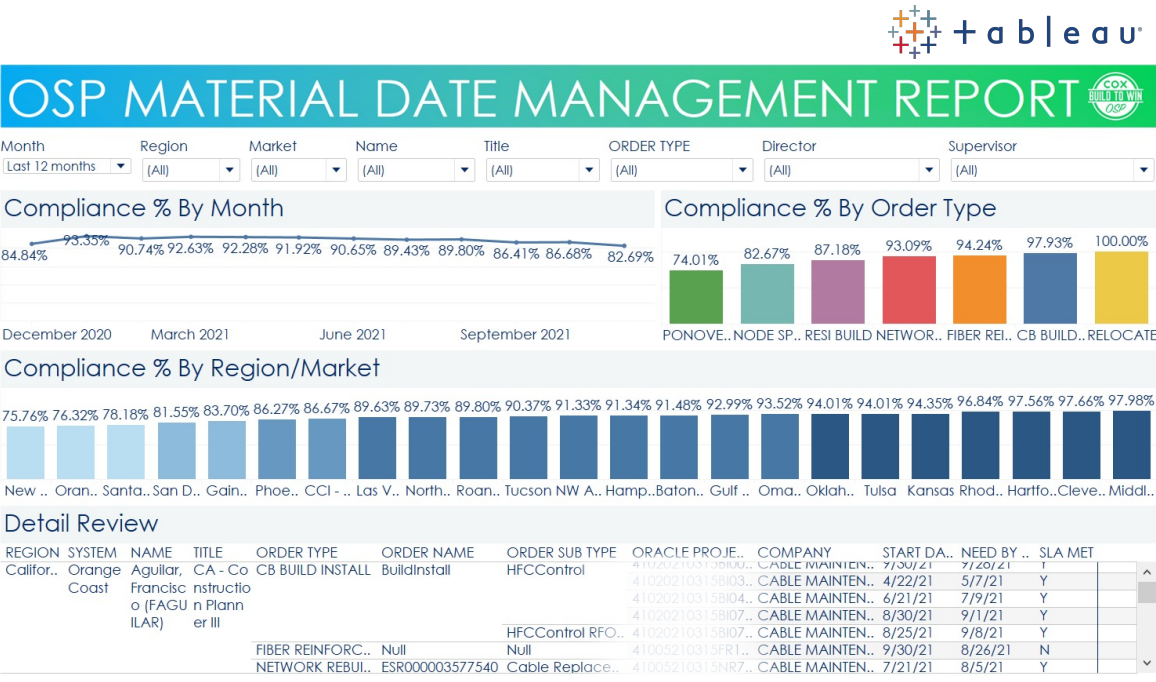

## Project 1 : WATTS Undo Task Report

- Objective** - Provide a weekly report of WATTS order IDs that have been cancelled or in progress. 22 markets have about 50,000 tickets each, visualizing the data helps view it more easily.
- How** – Using Alteryx to prepare data, and Tableau to visualize the data
- Impact** - Easy to prioritize which projects need to be completed and closed. Help identify anomalies and trends

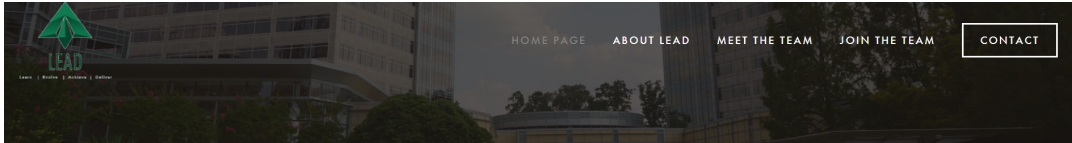

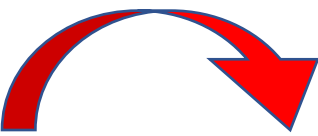

## Project 2 : Material Date Management Report

- Objective** - Provide leader and individual views of “need by” dates of compliant and non-compliant dates.
- How** - Using Alteryx to prepare data, and Tableau to visualize the data
- Impact** – Target regions that have delay in delivery. Help gauge when a material will deliver to a region. Identify anomalies within the data set.

## Stretch Assignment: Redesign Cox Lead website

- Objective** - Provide a fresh and modern view of the lead project management program.
- How** – Utilizing SquareSpace, animating pictures and condensing the paragraphs for a more user-friendly site.
- Impact** – Improve the user experience and performance. Promote cox brand within the website. Attract a bigger audience and applications.

## Why I add value to Cox:

- Creating dashboards to visualize data and enable data driven decisions.
- Leveraging SQL skills to build databases and pipelines.
- Creativity and critical thinking skills to drive innovation.
